Alukov®

COMPLETE YOUR HOME...

The **CARPORT** is an innovative product in the range of ALUKOV company products, a leading manufacturer of patio and pool enclosures. The construction is designed to fully comply with technical standards and also with the aesthetic design of modern architecture. CARPORT is a simple and elegant solution for protection of your car, quad bike, scooter or other parkable equipment against adverse weather conditions. Alukov Carport is using sloped roof for better rainfall drainage and also helps while the carport is covered under snow to withstand heavier weight load. If heavy rain and snowing is not an issue in your neighborhood you can choose flat roof solution as this is more suitable solution for climatically warmer environments. In any case the massive aluminum construction along with good anchoring can withstand heavy wind gusts. Therefore your car will be protected in all weather conditions in all seasons.

TYPE A WITH FLAT ROOF, SINGLE, 3000 x 5400 x 2730 mm

CARPORT will be especially appreciated by car owners who want a space-saving solution. Due to its dimensions, it can also easily fit into narrow spaces between houses.

Snowload: 125 kg/m², Windload: 100km/h

TYPE B WITH SLOPED ROOF, SINGLE, 3000 x 5400 x 2730 mm

Carport with a sloped roof is used wherever a slope is desired for faster drainage of water or melting snow. It is also possible to align the angle of Carport slope roof with the roof of the house.

Snowload: 270 kg/m², Windload: 100km/h

TYPE A WITH FLAT ROOF, DOUBLE, 5500 x 5400 x 2730 mm

Creates family parking with comfortable space for two passenger vehicles. The light-transmitting roof provides enough light for safe movement under the CARPORT, at the same time pleasantly dispersing sunlight.

Snowload: 115 kg/m², Windload: 100km/h

TYPE B WITH SLOPED ROOF, DOUBLE, 5500 x 5400 x 2730 mm

Strong construction with transverse profiles maximizes the load-bearing capacity of the roof. With a roof span of more than 10 m² the sloped roof is desirable for use especially at higher altitudes or it can better withstand higher snow and wind loads. A great shelter not only for cars.

Snowload: 190 kg/m², Windload: 100km/h

ALSO AVAILABLE CARPORT CAMPER - IN SIZES STANDARD, L, XL

If you are looking for a caravan shelter, CARPORT CAMPER is the right option. Not only will it protect your caravan, but it can give you extra space for other accessories. CARPORT CAMPER is weatherproof, quick to assemble and less expensive than building a caravan sized garage. You can choose from several sizes to suit your caravan size.

WHY CHOOSE CARPORT?

- financially and spatially less demanding than building a garage
- protection of the paintwork and interior of the car from UV sun damage
- protection of bodywork and windows from hail
- protection of bodywork and paintwork against debris
- minimum to no maintenance
- no need for construction permit
- additional use beyond parking vehicles
